The ULTIMATE Cross Stitch Alphabet Book

by The Kooler Design Studio

over 100 alphabets

INTRODUCTION

We asked the creative design group at the Kooler Design Studio to come up with new, creative alphabets. They went way beyond their mission and simply wowed us with the most creative and interesting alphabets ever! This is definitely *The Ultimate Alphabet Book.*

The covers and color pages at the center of the book show part of each alphabet stitched (not all of each). Alphabets using more than one floss color are followed by color keys; for floss number to match name of color, refer to Master Color Key on page 45. Alphabets using only one floss color have no color key and may be stitched with any color you wish.

FRONT COVER

PAGE 22

PAGE 23

PAGE 24

BACK COVER

Numbers on photos refer to the page where each stitched alphabet begins.

Bobbie Matela, Managing Editor
Carol Wilson Mansfield, Art Director
Jane Cannon Meyers, Creative Director
Ann Harnden, Editor
Dawn Barratt & Mary Hernandez, Book Design
Dawn Barratt, Pat Hawes, Mary Hernandez, Terea Mitchell, Brent Rathburn, & Patty Rathburn, Charts

Photographed models were stitched by: Linda Causee, Vickie Entreken, Marlene Hommerding, Pam Nichols, Carly Poggemeyer, and Carrie Snider.

Alphabets designed by Barbara Baatz, Holly DeFount, Linda Gillum, Jorja Hernandez, Lorna McRoden, and Nancy Rossi.

We have made every effort to ensure the accuracy and completeness of these instructions. We cannot, however, be responsible for human error, typographical mistakes, or variations in individual work.

GENERAL DIRECTIONS

EVENWEAVE FABRICS

You'll find a wide selection of evenweave fabrics for cross stitching in your needlework department or store. The term "evenweave" means that the fabric has the same number of threads (or square blocks of threads) per inch, horizontally and vertically. That number is called its thread count. The finished size of a cross stitched motif depends not only on its width and height, but on the thread count of the chosen fabric.

EMBROIDERY FLOSS

Several color groups of six-strand cotton floss were used to stitch the alphabets. Generic color names are given throughout this book. A Master Color Key is on page 45 with the Anchor, Coats, and DMC embroidery floss number translations for these names. Because dye lots can vary and each company has its own color families—which may not match from brand to brand—these translations are only suggested substitutions; alter them as desired. *Note:* A translated number may appear twice on the Master Color Key, especially when there is not a perfect match, but both colors will not appear in the same design.

These alphabets were cross stitched on 16-count Aida cloth with two strands of floss. This combination allows the true color intensity to show. On 14-count fabrics, the same number of floss strands is usually used, but the color will be less intense because the background fabric is slightly visible. On 18-count fabrics, one strand of floss is usually used. Cut floss into comfortable working lengths—we suggest about 18". Size 24 or 26 blunt-pointed tapestry needles are suitable for 14- or 16-count fabrics, and size 26 for 18-count.

CHARTED DESIGNS

Each square on a chart represents space for a cross stitch, and a symbol in a square specifies the color to be used according to the color key. If the color name appears without a preceding symbol and equal sign, the color is only used for one of the following decorative stitches. Backstitches and straight stitches are indicated by straight lines, French knots by a dot, and lazy daisies (or partial ones) by their shape.

If an alphabet uses only one color, each cross stitch is designated by an "x," backstitches are shown as straight lines, but no color key is given. Choose your color using covers and color photo pages for reference.

If an alphabet requires more than one color, there is a color key at the end of the alphabet. The key contains color names and the symbols that represent those colors for that alphabet. *Note:* While the generic names for the numbers are consistent, the symbols may differ between alphabets because they are chosen for best visibility with each alphabet. Look up each color by name in the Master Color Key on page 45 and use the appropriate color number for your chosen brand of floss.

USING ALPHABETS

Before starting to stitch, plan the repeat width and height of the letter or groups of letters and placement on graph paper. Use any size graph paper you want. Remember, the size of your alphabet is determined by the thread count of your fabric, not the planning paper. If you want to fit a predetermined space, count the fabric squares available for stitching and choose an alphabet to fit.

THE STITCHES

Note: Unless otherwise noted in the color key, use two strands of floss for cross stitches and French knots, one strand for backstitches, straight stitches, and lazy daisies. To begin, bring threaded needle to front of fabric. Hold an inch of the end against back, then anchor it with your first few stitches. To end threads and begin new ones next to existing stitches, weave through backs of several stitches.

Cross Stitch

The cross stitch is formed in two steps. Follow the numbering in Fig 1 and bring needle up at 1, down at 2, up at 3, down at 4, to complete the stitch. Work horizontal rows of stitches, Fig 2, wherever possible. Bring thread up at 1 and work half of each stitch across the row, then complete the stitches on the return.

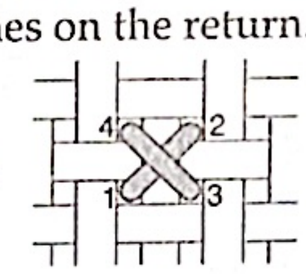

Fig 1

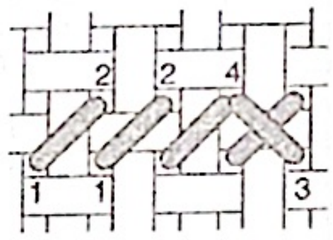

Fig 2

Backstitch

Backstitches are worked after cross stitches have been completed. They may slope in any direction and may be worked over more than one square of fabric. Fig 3 shows the progression of several stitches; bring thread up at odd numbers and down at even numbers.

Sometimes you have to choose where to end one backstitch color and begin the next color. As a rule of thumb, choose the object that should appear closest to you. Backstitch around that shape with the appropriate color, then backstitch the areas behind it with adjacent color(s).

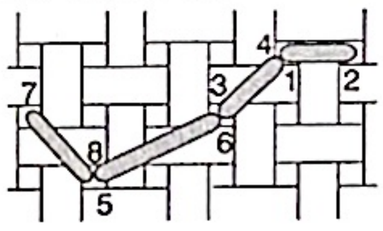

Fig 3

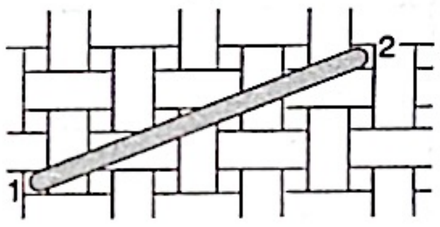

Fig 4

Straight Stitch

A straight stitch, Fig 4, is made like a long backstitch. Come up at one end of the stitch (1) and down at the other (2). Make straight stitches after all other stitching is finished.

French Knot

Bring floss up where indicated on chart (1). Wrap floss once around needle, Fig 5. Reinsert needle at 2, close to 1. Hold wrapping floss tightly and pull needle through, letting thread go just as knot is formed. For a larger knot, use more strands of floss, but wrap only once.

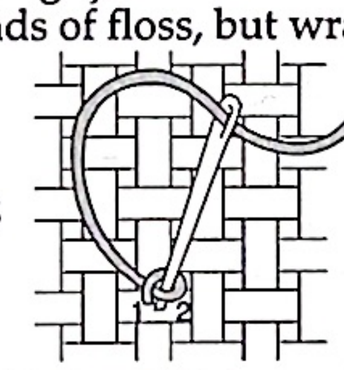

Fig 5

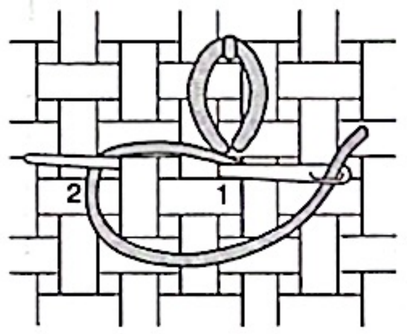

Fig 6

Lazy Daisy Stitch

Bring thread up at center hole (1), Fig 6. Loop floss, insert needle in same hole, and bring it out two squares from center (2) or as indicated on chart, with loop beneath point of needle. Pull needle through, adjusting size and shape of loop. Stitch down over loop, one thread farther from center, to secure it. Repeat for each oval shape.

FINISHING

Wash stitched fabric in cool water with a gentle soap. Rinse well. Roll in a towel and squeeze out excess moisture. Place face down on a dry towel or padded surface and press carefully. Frame or finish as desired.

MASTER COLOR KEY

The generic color names in this book represent the following numbers listed by brand. Most color groups have seven values beginning with very light (very lt) and ending with very dark (very dk). Symbol selection varies with each alphabet, but the names are consistent. For example, in any Color Key with a symbol specified as very lt pink, choose Anchor 50, Coats 3151, or DMC 605; for a symbol specified as med dk pink, choose Anchor 29, Coats 3047, or DMC 309.

	Anchor	Coats	DMC
